

KEEPING ALL OF YOUR WORK FLOWING FROM HOME

A guide to staying operational at home without expensive development costs with:

AUTOMATE YOUR WORKFLOWS

Have current processes identified and documented into functional workflows that are designed in Accelerate. Accelerate then sorts out the workload into tasks for the right individuals or bots to complete. Each member has a unique dashboard with their own queue of tasks so you and your team can complete work no matter where you're located.

TRACK YOUR OPERATIONS

Accelerate automatically tracks and manages tasks, files and documents needed to complete each unit of work. So instead of having to collate things manually, or search for all the pieces, they're brought to you in a unique work package for you or a bot to complete!

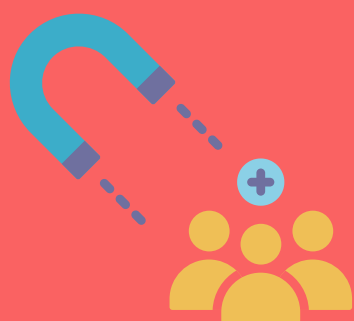

MEASURE KPIS

Now that your work is in progress, you're ready to start measuring in real-time! Increased efficiency, productivity and lowering costs all leads to a healthier profit margin for companies small and large. All metrics both high and low level are tracked in an auditable way allowing you to see everything as it happens.

IMPROVE ENGAGEMENT AND PERFORMANCE

Accelerate proves itself over time by measuring your teams performance and intelligently escalating work items so you are the first to know about any work-jams. It also eliminates repetitive tasks allowing you and your team to focus on the stuff that matters most.

ATTRACT NEW AND RETAIN EXISTING CUSTOMERS

Getting work completed is great, but helping people is awesome! Accelerate makes remediating exceptions a breeze with its visibility and file management. Locate inquiries and item statuses with just a few clicks - so you always have happy customers!
